## **DETAILED ACTION**

### ***Status of the Claims***

1. This action is in response to the RCE filed on March, 1, 2006. Claims 8-18 and 20-57 are pending. Claims 1-7 and 19 are canceled. Claims 8-14 and 16-17 are amended. Claims 20-57 are added.

### ***Election/Restrictions***

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 8-18, drawn to matching information stored in the database, classified in class 707, subclass 6.
  - II. Claims 20-43 and 47, drawn to monitoring user actions, classified in class 717, subclass 127.
  - III. Claims 44-46, drawn to collecting statistical data, classified in class 725, subclass 9.
  - IV. Claims 48-50, drawn to providing non-disclosure agreements, classified in class 705, subclass 1.
  - V. Claims 51-57, drawn to access control, classified in class 715, subclass 741.
3. The inventions are distinct, each from the other because of the following reasons:
- Inventions I, II, III, IV and V are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination I has

separate utility such as matching module; subcombination II has separate utility such as tracking system; subcombination III has separate utility such as accumulating statistical data; subcombination IV has separate utility such as providing non-disclosure agreements; and subcombination V has separate utility such as providing access permission. See MPEP § 806.05(d).

4. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

6. The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

7. Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
